

A Special Event at the Creative Discovery Museum - Chattanooga, Tennessee

Inspired by their mutually shared commitment to inclusive play, Creative Discovery Museum and Snug partnered to host a special event showcasing a new concept in play on Thursday August 19th. The family event was held for local children of all abilities to be a part of an inclusive play experience and for evaluators from the National Lekotek Center to conduct a comprehensive product evaluation of one of PlayCore's newest product lines, Snug Play USA. The report will capture the benefits of the product and outline how it rates in the areas of cognitive, sensory, communication, social, and physical development for children with special needs. The AblePlay™ rating system was developed by Lekotek and is considered the leading authority on products surrounding play for children with disabilities.

Creative Discovery Museum is recognized as one of the top children's museums in the nation. It is a non-profit organization dedicated to educational enrichment for children age's 4-months to 12-years-old through interactive, hands-on experiences that foster creative and critical thinking. Creative Discovery Museum focuses on a broad range of areas encompassed by Visual Arts, Performing Arts, Technology and the Sciences.
